Both these mattresses are manufactured by Parkhouse in the UK and are designed to fit wider than normal bed frames profiling or static.

The Memaflex Bariatric Replacement visco-elastic gel foam mattress is designed for patients at high pressure risk. It offers excellent pressure redistribution. This mattress does not require turning. It is suitable for patients up to 318kg (50 stone).

The Delta offers alternating air pressure relief for clients up to 350kg (55 stone). It is available in a wider 120cm width. For ease of cleaning the cover includes printed instructions and is fully zipped to prevent accidental fluid contamination. It meets the highest European Infection Control Protocols.
