

molift partner 205

molift[®]
designed for life

The best days are those when you feel you have extra energy - either for work or for leisure. Molift's products are designed to give you this. They are easy and intuitive - both in use and to understand. The design makes it easy to get into narrow and small spaces. In the end, their most important function is to get the job done, without putting your back at risk. Invest in your own well being by letting Molift patient lifters do the heavy work. This will give you extra energy to help more people, help them better, spend quality time with them, or have more energy for yourself.

The expert on moving and handling

Molift Partner 205 a specialist piece of equipment for moving and handling

The Molift Partner 205 handles **all** moving and handling situations, within the community, hospital or care home environment. You can perform lifts from the floor without any height adjustment of the column, while still giving an excellent lifting height. With its unique quick-release system, you can quickly and easily change the suspension and adjust it to the individual patient and moving task. The new Molift Stretcher does not need its own suspension. It can be mounted directly on the standard Molift Partner 205 4-point suspension. In addition the Molift Partner 205 can be delivered with Molift Scale and Supporting Arms (optional)

Molift Partner 205 makes life easier

With its low weight and optimum wheel placement the Molift Partner 205 is easy to move around, even if the patient weighs up to 205 kg. The low chassis makes it easy to position it in under furniture and low beds. It is easy to clean and the surfaces of the Molift Partner 205 can be disinfected.

Molift Partner 205 with 4-point suspension

Molift Partner 205 comes with a standard 4-point suspension. This prevents the patient from feeling cramped, as the seating position is open and gives plenty of room for the head. The combination with a Molift sling enables comfortable and correct positioning from lying to sitting or vice versa as the sling loops glide into a natural position during the lifting process. The Molift Partner 205 suspension has various options available, for example a 2-point suspension.

Automatic service warning feature

Molift Partner 205 has built-in electronics, which automatically gives a warning that a service is needed. The Molift Partner 205 is also equipped with all the standard safety controls, such as electric and manual emergency lowering. The Molift Partner 205 comes with a new shaped rechargeable battery, the new re-shaped charger will also re-charge all other Molift batteries.

Molift on moving and handling

Heavy and incorrect lifting among healthcare workers is causing chronic muscle and skeletal damages leading to increased sick leave and a reduced quality of life.

As a total supplier of moving and handling products and solutions, we are committed to provide carers with the optimal knowledge and support.

Item no.:	14001

Molift - designed for life

At times with increasing demand for efficiency in the healthcare sector and growing focus on patient needs, it is easy to neglect the needs of the carer. The need to give better help and caring avoiding heavy lifting situations, avoiding putting your own back at risk, without being completely exhausted after work and still have some surplus energy when the workday is over.

This is the insight that drives us at Molift. The company which was started 20 years ago by a man who through his own experience saw the need for lifting and moving patients in an effective and comfortable way – for both patient and carer.

We have since then delivered products that compliment the natural movement of the body, that is both simple and intuitive to use. Products designed to give the patient a better life in addition to providing the carer with real support and optimum work enjoyment.

This is the true meaning of; Molift – designed for life
