

molift partner 230

molift[®]
designed for life

The best days are those when you feel you have extra energy-either for work or for leisure. Molift's products are designed to give you this. They are easy and intuitive-both in use and to understand. The design makes it easy to get into narrow and small spaces. In the end, their most important function is to get the job done, without putting your back at risk. Invest in your own well being by letting Molift patient lifters do the heavy work. This will give you extra energy to help more people, help them better, spend quality time with them, or have more energy for yourself.

Molift Partner 230

Molift Partner 230 Makes Positioning Easier

The Molift Partner 230 is a mobile lift with a vertical lifting pattern, which is the easiest and most logical way of lifting a person. The advantage of vertical instead of the half-curved lifting, is that correct positioning of the user in a chair or bed or on the toilet is much easier. Furthermore, the distance between the user and the lifting arm and column is the same throughout the lifting movement, and the user is in a safe and stable position with no risk of collision with the lift. Molift Partner 230 has a 4-point suspension and in combination with a Molift sling it enables comfortable and correct positioning from lying to standing or vice versa as the sling loops glide into a natural position during the lifting process. Molift Partner 230 is therefore the perfect lift to and from any position

Molift Partner 230 Makes Life Easier

Low weight and optimal wheel placement makes it extremely easy to move the Molift Partner 230 around, even if the user has a weight of 230 kg. The low chassis makes it easy to get under furniture and low beds. The Molift Partner 230 has electrical, adjustable legs, which make it easy to get around wheelchairs and comfort chairs. The ergonomically designed hand control is comfortable to hold and secures easy and quick use. The Molift Partner 230 is easy to clean and disinfect. It can be delivered with scale as an optional extra.

Molift Partner 230 – New and Improved Batteries and Charger

Molift Partner 230 has new and more powerful batteries. The batteries can be charged at any time. The new charger can be used for all previous batteries, both NiCd and NiMH, and thus replaces all previous Molift battery charger models.

Molift Partner 230 Takes Service and Safety Seriously

Molift Partner 230 is equipped with an electronic unit, which registers the number of lifts and alerts the user when a service check is due. Molift Partner 230 is equipped with all the standard safety controls, such as electric and manual emergency lowering functions.

Specification:

Lifting capacity:	230 kg
Leg height:	110 mm
Total width:	690 mm inner/1,250 mm outer position
Total weight:	39 kg
Battery:	1,9 Ah / NiMH
Lifting height:	1275 mm
Measurements:	1902x1175x700 mm
Material:	Aluminium, steel and composite plastic
Item No.:	13003

Molift - designed for life

At times with increasing demand for efficiency in the healthcare sector and growing focus on patient needs, it is easy to neglect the needs of the carer. The need to give better help and caring avoiding heavy lifting situations, avoiding putting your own back at risk, without being completely exhausted after work and still have some surplus energy when the workday is over.

This is the insight that drives us at Molift. The company which was started 20 years ago by a man who through his own experience saw the need for lifting and moving patients in an effective and comfortable way – for both patient and carer.

We have since then delivered products that compliment the natural movement of the body, that is both simple and intuitive to use. Products designed to give the patient a better life in addition to providing the carer with real support and optimum work enjoyment.

This is the true meaning of; Molift – designed for life
